

H.L. Blachford Ltd. announces partnership with Italian lubricants and MWF company, Bellini S.p.A., to distribute products in North America.

[August 5, 2022] H.L. Blachford Ltd., a Canadian chemical manufacturer, is pleased to announce they signed a partnership agreement on June 1st, 2022 with Bellini Tecnologia Della Lubrificazione SpA, a lubricants and metal working fluids manufacturer headquartered in Bergamo, Italy. H.L. Blachford Ltd. will be distributing their products in Canada and the United States of America. They will now be able to offer their customers a wide variety of new products ranging from water-miscible coolants, neat cutting oils, forming and drawing lubricants to industrial lubricants, and more.

"We are excited about this strategic alliance with Bellini. It expands our product offering, allows us to re-enter key metalworking markets, and brings a strong value proposition to our future customers," says Michael Cundari (President, H.L. Blachford Ltd.).

"We enter this partnership with high expectations as Blachford is a technology based chemical manufacturer with whom we share a similar history and values such as reliability and dedication to technical customer satisfaction," says Marco Bellini (President, Bellini SpA). "We think that North America is one of the most important markets in the world in industrial manufacturing, a market where Bellini SpA technology can support these industrial processes." says Valentino Foiadelli (Sales Director, Bellini SpA).
